ABOUT ME

It was during my schooling for Geographic Information Systems that I discovered my true passion for coding. Taking classes such as GIS Programming, which used Python, and CS courses that taught Java, I found the subject that I knew I wanted to pursue as my career. Post-graduation, I have delved fully into the world of coding and software development. Coding is not something I look at as just a job, but a chance to create and perform fulfilling and challenging tasks. Below are my projects that will showcase my skills and knowledge of software development.

EXPERIENCE

E-Commerce Site app code

This full-stack application emulates a real-world e-commerce site and was built using React/Redux, Express/Node.js, and MongoDB. This app uses simple authentication, allows users to select items from multiple categories, and purchase and save their orders.

Flight Booker app code

This application uses React/Redux to display and retrieve random flight data from a custom Express/Node.js server. The app allows users to modify flight settings, such as passengers, bags, and carry-ons and save/delete from the server.

Weather Finder app code

This application displays current weather conditions for any city in the world. This application utilizes a custom interactive map, CSS, vanilla JavaScript, and AJAX to get weather data from the DarkSky.net API.

Matching Game app code

This React application emulates a simple matching game in which cards are turned over to reveal pictures. Players must find a cards' matching pair to remove it from the board. Score is kept by number of moves.

EDUCATION

Geography, B.A.	California State Univeristy, Long Beach	Concentration in Spatial Science and Geographic Information Systems	January 2017 - May 2019
Geography AA-T and Natural Sciences AS	Sierra College	Concentration in Geographic Information Systems	August 2013 - December 2016

EMPLOYMENT

Flexible Fufillment Team Member	**Store Clerk**	**Flow Team Member**
Target Corporation	Yogurt Time Cafe	Target Corporation
Seal Beach, CA	Antelope, CA	Roseville, CA
October 2017 - Current	August 2013 - January 2017	July 2011 - August 2012
